GET MORE THAN THE WORLD'S FINEST FITNESS EQUIPMENT

When you choose Matrix, you're getting more than the world's finest fitness equipment. You're getting a partner that will be there, for your grand opening and every day after. Together, there's no detail of your business that we can't refine, reimagine or reinvent. And that includes your bottom line.

FACILITY PLANNING

Your space. Your goals. Your budget. We'll help bring your fitness center to life from your earliest ideas to the day you open your doors.

CERTIFIED INSTALLATION/SERVICE KIT

Maximize uptime. Optimize your investment. We provide all the tools you need to get up and running and stay that way.

INDUSTRY-LEADING WARRANTIES

Our promise of quality to you. We offer all of the protection you need to choose confidently, and know that you've chosen the products with the lowest cost of ownership in the industry.

DEDICATED SALES SUPPORT

Our internal teams will work with you to help you reach your unique goals. We'll help you choose the ideal mix of products for your needs and work with you to update and expand as your needs change.

* Availability of financing options varies by market.

FINANCING*

Whenever possible, we work with our customers to develop financial solutions that expand their options and maximize their investments.

UNMATCHED CUSTOMER SUPPORT

A 90% first-time fix rate. A 48-hour service response window. Revolutionary Asset Management. And with our amazing console technology, we can provide diagnostic services remotely or on site.

MATRIX LEARNING

Product training. Maintenance tips. Career building. On-demand educational videos. A whole new world of service and support. It's all at your fingertips with Matrix Learning (matrixlearningcenter.com).

TOTAL MARKETING SUPPORT KIT

You want to let clients know about the exciting programs and products that make your facility different, and we want to help. Ask us about customized promotional materials to help you reach and retain clients like never before.

RIX
• Beautiful

STRONG. SMART. BEAUTIFUL.

It's more than a tagline. It's our holistic promise to you that these three qualities will shine through every product that hits your floor and define our ongoing partnership.

STRONG

Our high-quality, ultra-durable products are just as strong as our commitment to be your partner, not just your supplier. This strength gives us a solid foundation for success, today and in the future, and has made us one of the world's fastest-growing commercial fitness brands.

SMART

We listen, and create products with a purpose in mind — to address your needs and resolve them in ingenious ways. Forward-thinking options redefine the exercise experience, for both you and your members.

BEAUTIFUL

Our products attract beginners and fitness enthusiasts alike. Every piece of equipment is approachable, unintimidating and a pleasure to use. We continue to set new industry standards through award-winning aesthetic distinction and incredible attention to detail.

GROUP TRAINING OVERVIEW

A BETTER WAY TO GET FIT: TOGETHER

Group training is on the rise because nothing else provides the kind of motivation, camaraderie and accountability members need to try new things, persevere through tough sessions and keep coming back for more. We can help you differentiate your fitness facility's offering by outfitting your studio, optimizing underutilized space and offering programming that appeals to a wide range of individuals. We'll bring the best of our own equipment and programming, as well as exclusive offerings from industry experts, to help you attract new members and retain them in a way only engaging group training can.

CARDIO

Signature cardio programs are the foundation of group training, and we offer options that can appeal to members of all kinds. Challenge your members with the versatile intensity of our user-driven S-Drive and S-Force Performance Trainers. Add our rower to your circuit training program for a low-impact cardio workout that strengthens the whole body. Offer an upper-body stationary cycle workout that builds aerobic capacity, strength and endurance with the Krankcycle. You can even create an advanced, accessible group cycling experience with our exciting new Training Cycles.

STRENGTH & FLEXIBILITY

For group training solutions focused on strength and flexibility, our distinctive offering will give enthusiasts the kind of dynamic exercise experience they won't find anywhere else. Our Connexus Functional Training System is nothing short of essential for classes where users perform weight-bearing exercises that reflect their daily activities. The smart, modular design of our Connexus collection offers flexibility and expandability, making it easy to transform underused spaces into functional training stations and expand your offering as interest in functional training grows.

TRAINING CYCLE OVERVIEW

PRECISION ENGINEERED FOR A SUPERIOR CYCLING EXPERIENCE

Our Training Cycles give you everything you need to attract more riders and make your group cycling classes a core part of their training regimen. All of our durable Training Cycles feature optimized ergonomics and intuitive adjustments that make it hassle-free for every member — no matter what their body type or ability level — to experience the feel of a real outdoor ride. From the seat to the handlebars to the controls, we've incorporated thoughtful design details that make each ride comfortable and natural. We've even simplified setup and service, so it's easy to get your group class started and keep all your members happy with dynamic cycles. Step up to the CXM Training Cycle to take metric tracking to the next level, or completely redefine the cycling experience with the CXP Target Training Cycle featuring a console with an LED wrap that uses vibrant color to help members and trainers track effort.

ADVANCED ERGONOMICS & ADJUSTMENTS

The detail-oriented design of our Training Cycles begins with a narrow Q-factor that optimizes the position of the hips, knees and feet to comfortably mimic a real outdoor riding experience. A magnetic system provides smooth, consistent resistance changes to help riders transition from one portion of the ride to the next, while intuitive four-way adjustment with quick-touch operation and easy seat tilt make customizing the cycle to each user's body virtually effortless.

ENHANCED COMFORT & CONVENIENCE

All of our Training Cycles include an ergonomically sculpted seat to relieve pressure on touchpoints, making even long, intense cycling classes comfortable. A contoured lever near the handlebars provides tactile feedback for on-the-fly resistance changes, and multi-position handlebars with an integrated water bottle holder provide a comfortable grip while keeping hydration easily accessible.

STREAMLINED SERVICE & SETUP

The low-maintenance, well-protected rear flywheel design of our cycles includes a quick-release service panel, easily removable pedal cranks and clearly identifiable internal components to make service a breeze for heavy-use facilities. Unlike traditional indoor cycles that require two wrenches to tighten or level the seat, our design requires only one Allen wrench to adjust the seat to the optimal position.

CXP TARGET TRAINING CYCLE

- Ideal for precision tracking during workouts that target watts, heart rate, RPMs, distance or calories, providing personalized intensity and progress metrics
- Intuitive touchscreen Target Training Display offers engaging graphics and an LED color wrap that helps instructors and riders gauge intensity (compatible with ANT+ and Bluetooth)
- Interval, pace, heart rate, goal-based and HIIT workouts provide variety
- Narrow Q-factor optimizes ergonomics for a real outdoor riding feel
- Low-maintenance, well-protected rear flywheel design includes magnetic resistance for smooth, repeatable adjustments and watt measurement within 3% accuracy
- Contoured lever provides tactile feedback for quick resistance changes
- Intuitive adjustments customize the cycle to each user's body
- Ergonomically sculpted seat relieves pressure on touchpoints
- Multi-position handlebars include water bottle holders
- Forged steel pedal cranks include quick-adjust straps
- Quick-release service panel, removable pedal cranks and dial levelers streamline service and setup

TARGET TRAINING DISPLAY

Our advanced CXP Target Training Cycle includes a unique display that makes it easier than ever to keep everyone in your class on track to reach their goals. Integrated FTP testing and a sub-max heart rate test help members establish personalized targets just right for their ability levels. Then an LED wrap lights with vibrant colors to help members maintain effort whether your class is tracking watts, calories, RPMs, heart rate or powering through a HIIT workout.

CXM TRAINING CYCLE

- Ideal for metric-focused group cycling classes or for use by riders on your cardio floor
- LCD console clearly displays key metrics and offers intuitive operation when switching between watts, heart rate, RPMs or lap mode (compatible with ANT+ and Bluetooth)
- Narrow Q-factor optimizes ergonomics for a real outdoor riding feel
- Low-maintenance, well-protected rear flywheel design includes magnetic resistance for smooth, repeatable adjustments and watt measurement within 10% accuracy
- Contoured lever provides tactile feedback for quick resistance changes
- Intuitive adjustments customize the cycle to each user's body
- Ergonomically sculpted seat relieves pressure on touchpoints
- Multi-position handlebars include water bottle holders
- Quick-release service panel and removable pedal cranks streamline service

CXC TRAINING CYCLE

- Ideal for group cycling classes or for use by riders on your cardio floor
- Narrow Q-factor optimizes ergonomics for a real outdoor riding feel
- Low-maintenance, well-protected rear flywheel design includes magnetic resistance for smooth, repeatable adjustments
- Contoured lever provides tactile feedback for quick resistance changes
- Intuitive adjustments customize the cycle to each user's body
- Ergonomically sculpted seat relieves pressure on touchpoints
- Multi-position handlebars include water bottle holders
- Integrated device storage shelf keeps smartphones in view
- Optional wireless LCD console clearly displays RPMs, calories, distance, time and even heart rate when used with a heart rate strap
- Quick-release service panel and removable pedal cranks streamline service

PROGRAMMING

PRECISE METRICS. EXHILARATING RIDES.

Matrix Ride — our exclusive, all-original target training programming — makes it easy for trainers to lead a next-level cycling class that engages a wider range of members by focusing on meaningful metrics including watts, heart rate, RPMs, distance and calories. These focused, inclusive classes will quickly become the most popular events on your facility timetable while helping all who participate get measurable results.

Designed to work with our CXP Target Training Cycle, our programming package includes an eight-hour workshop, an educational manual, lesson plans and more, giving trainers everything they need to create an industry-best cycling class that sets your facility apart from others in powerful ways. Trainers will learn how to get the most out of the CXP's advanced features, including FTP testing, how to adjust the cycle to different body types and how to scale classes for different ability levels. They'll also learn how to incorporate the CXP console's LED color wrap to gauge member effort across a range of tangible metrics, develop a variety of metric-based goals to keep classes fresh and create an exciting group environment that brings camaraderie and competition to every cycling session.

Choose CXP Target Training Cycles, and you'll get access to a product-focused education workshop delivered by one of our Master Trainers at your facility.

* Availability may vary by market

S-DRIVE PERFORMANCE TRAINERS

DISCOVER INTENSITY + VERSATILITY

Bring our S-Drive Performance Trainer to your fitness center to offer members an incredibly versatile high-intensity interval training (HIIT) solution that is easily integrated into virtually any circuit program. Placed between weight or functional training stations, your members can take on all-out sprints, sled pushes or parachute training with magnetic resistance settings just right for their ability level and goals. This multipurpose piece of equipment can help users of all ability levels improve conditioning and refine form with precise, immediate feedback from instructors. For tracking of metrics during training, the S-Drive Metrics and S-Drive Power feature an integrated console. See the full product listing for more details.

S-DRIVE POWER SDXP

- Intuitive touchscreen Target Training Display includes engaging graphics, interval and Sprint 8 programming and a unique LED wrap that helps trainers and members gauge intensity with bright colors (compatible with ANT+ and Bluetooth)
- Target Training Display pivots so coaches and trainers can easily view feedback
- Integrated sub-max heart rate testing helps members establish goals right for their ability level
- Sled brake with eight magnetic settings provides a true-to-life weighted sled pushing experience up to 122 kg / 270 lbs.
- Parachute brake with 11 settings gives users the feel of real parachute resistance
- Sled and parachute brakes can be used individually or together to vary between cardio and strength-building workouts
- Magnetic brake systems provide repeatable resistance ideal for athletic progression programs
- Easily adjustable harness allows for a complete upper body range of movement and stores conveniently out of the way when not in use
- Built-in bar simulates sled pushing and pulling while tracking power in watts
- 7-degree incline maintains natural sprint mechanics while reducing starting effort
- Full perimeter handrails offer easy entry and exit and support during lateral movement
- Low-inertia design with a true zero start speed and unlimited top speed offers true-to-life ground reaction force and quick deceleration, ideal for high-intensity interval training
- Lubrication-free, low-friction belt and heavy-duty deck design stands up to the most intense workouts
- 17.8 cm / 7" step-on height offers easy access for all users

TARGET TRAINING DISPLAY

Engineered specifically for goal-based training, the Target Training Display on the S-Drive Power makes it easier than ever for members to take on sprints, sled pushes and parachute training with precision metric tracking. The unique LED wrap helps trainers and members gauge intensity with bright colors and the integrated sub-max heart rate testing allows members to establish personalized targets just right for their ability level. Whether tracking watts, speed, time, distance, heart rate or taking on high intensity interval training, the personalized metrics help members maintain effort and reach their goals.

S-DRIVE METRICS SDXM

- Quick-response, backlit LCD console clearly displays speed, time, distance and heart rate (with strap), offers instant access to interval and Sprint 8 programming and even pivots so coaches and trainers can view feedback
- Integrated sub-max heart rate testing helps members establish goals right for their ability level
- Sled brake with eight magnetic settings provides a true-to-life weighted sled pushing experience up to 122 kg / 270 lbs.
- Parachute brake with 11 settings gives users the feel of real parachute resistance
- Sled and parachute brakes can be used individually or together to vary between cardio and strength-building workouts
- Magnetic brake systems provide repeatable resistance ideal for athletic progression programs
- Easily adjustable harness allows for a complete upper body range of movement and stores conveniently out of the way when not in use
- Built-in bar simulates sled pushing and pulling without needing the space to use a traditional sled
- 7-degree incline maintains natural sprint mechanics while reducing starting effort
- Full perimeter handrails offer easy entry and exit and support during lateral movement
- Low-inertia design with a true zero start speed and unlimited top speed offers true-to-life ground reaction force and quick deceleration, ideal for high-intensity interval training
- Lubrication-free, low-friction belt and heavy-duty deck design stands up to the most intense workouts
- 17.8 cm / 7" step-on height offers easy access for all users

S-DRIVE PERFORMANCE TRAINER SDXC

- Sled brake with eight magnetic settings provides a true-to-life weighted sled pushing experience up to 122 kg / 270 lbs.
- Parachute brake with 11 settings gives users the feel of real parachute resistance
- Sled and parachute brakes can be used individually or together to vary between cardio and strength-building workouts
- Magnetic brake systems provide repeatable resistance ideal for athletic progression programs
- Easily adjustable harness allows for a complete upper body range of movement and stores conveniently out of the way when not in use
- Built-in bar simulates sled pushing and pulling without needing the space to use a traditional sled
- 7-degree incline maintains natural sprint mechanics while reducing starting effort
- Full perimeter handrails offer easy entry and exit and support during lateral movement
- Low-inertia design with a true zero start speed and unlimited top speed offers true-to-life ground reaction force and quick deceleration, ideal for high-intensity interval training
- Lubrication-free, low-friction belt and heavy-duty deck design stands up to the most intense workouts
- Self-powered design makes it easy to place the unit anywhere in your facility
- 17.8 cm / 7" step-on height offers easy access for all users

PROGRAMMING

SUPERIOR CIRCUITS & BEYOND

SMALL GROUP CIRCUITS

By incorporating the S-Drive Performance Trainer in your small group circuit training, there's no limit to the different ways your trainers and instructors can provide full-body workouts. By using the S-Drive as a station and adding two TRX stations, two dumbbell stations, two core stations and a plyometric station, you can give members an unmatched exercise experience that improves both cardiovascular and muscular fitness. For facilities new to small group circuit training, we've created a turnkey nine-week protocol to help you get started with a program that attracts and retains new members.

LARGE GROUP CIRCUITS

For large group circuit training, alternating between the S-Drive Performance Trainer and other essential exercises can provide the intensity your members crave. For example, while one athlete begins with a low-resistance, long-stride walk on the S-Drive, another athlete can take on complementing functional exercises like TRX chest presses, floor-based dumbbell exercises or core exercises. They would then switch, building cardiovascular, anaerobic and muscular endurance as they progress through sets that provide maximum results in minimum time. And just like for our small group circuit training, we've created a comprehensive turnkey protocol to help your facility get up and running immediately with a program that appeals to exercise enthusiasts of all ability levels.

SPORTS PERFORMANCE TRAINING

The S-Drive Performance Trainer provides high-intensity training ideal for helping athletes of all levels achieve their maximum potential. With the ability to simulate sprinting, sled pushing and resistance/parachute exercises, the S-Drive can significantly enhance explosiveness and endurance. In addition, athletes can improve overall agility through a mix of forward, lateral or reverse movements. The S-Drive Performance Trainer's unique design also makes it easier than ever for coaches and trainers to refine form with instant feedback and adjust resistance to create a program progression tailor-made for their athletes' goals.

REHABILITATION & ACTIVE AGING

The S-Drive Performance Trainer can also provide significant benefits in environments where users are training to recover from an injury or older users are striving to maintain functional health. Full perimeter handrails help make entering and exiting easy and secure, a true zero starting speed accommodates users of any fitness level, and the self-powered design provides a more natural gait than traditional treadmills.

S-FORCE PERFORMANCE TRAINER

INTENSELY DIFFERENT

The S-Force Performance Trainer combines a specifically designed motion, two active positions and magnetic resistance to build speed and power and take HIIT workouts to the next level. The S-Force leverages intelligent biomechanics to create a rigorous exercise experience, whether you're using it as a challenging part of your circuit, for small group training or as a stand-alone station on your cardio floor. As members move through a user-defined path that fits their individual stride, the magnetic system automatically increases resistance the harder they work. This progressive design means that each interval will challenge HIIT enthusiasts and even elite athletes.

FEATURES

INTENSE BY DESIGN

MAGNETIC RESISTANCE SYSTEM

Smooth, quiet magnetic resistance system and a specifically designed motion provide low-impact, high-intensity exercise.

PROGRESSIVE WORKOUTS

With increased speed comes increased resistance, creating challenging, progressive workouts.

TWO ACTIVE POSITIONS

The upright position targets calves and hamstrings, while the acceleration position works the shins and quadriceps.

SPECIFICALLY DESIGNED MOVEMENT

User-defined path accommodates up to a 91 cm / 36" stride length.

CONSOLE

Adjustable backlit console provides complete, easy-to-read feedback.

INTUITIVE USE

Clearly defined quick keys offer instant access to Sprint 8, interval training and goal-based training programs.

ERGONOMICALLY SOUND GRIP

Contoured handlebars offer multiple grips, facilitating the upright and acceleration user positions.

COMFORT & STABILITY

Foot platforms and an ergonomically sculpted seat provide stability when entering and exiting the product.

VERSATILITY OF PLACEMENT

Cord-free design and integrated wheels make it easy to place the unit anywhere in your facility.

PROGRAMMING

ACCELERATE YOUR CIRCUIT

S-FORCE HIIT PROTOCOLS

Our complete collection of HIIT protocols include our exclusive Sprint 8 program, a variety of interval lengths and HIIT ladders to make group and circuit training more intense and engaging than ever. The diverse selection of high-intensity interval training will keep every session fresh, and the fat burning, muscle-building results will ensure that your members keep coming back for more.

SPEED TECHNIQUE PROTOCOLS

The Matrix Speed Technique Protocols combine the uniquely challenging designs of S-Force and the S-Drive Performance Trainer to take your athletes to the apex of speed. Simply follow our original protocols to help athletes of all kinds reach their ultimate potential in acceleration, top-end speed and change-of-direction movement.

ROWERS

A NATURALLY INTENSE ROWING EXPERIENCE

Take advantage of the growing popularity of rowing in group formats by bringing one of our sleek, thoughtfully designed rowers to your circuit. A small footprint that doesn't sacrifice performance makes it easy to fit our rower between specialized stations, breaking up weight and functional training with a low-impact cardio workout that strengthens the entire body. A versatile, exceptionally comfortable design makes it easy to switch between speed work, distance rowing and high-intensity interval training, and accurate, complete data feedback will help your users measure improvement to get the most out of their precious workout time. Created specifically for the busiest circuit training environments, our durable, low-maintenance rowers are ready for a steady stream of users, day in and day out.

RXP ROWER

- Ideal for creating metric-driven training circuits and original group rowing classes or for offering an engaging experience on your cardio floor
- Intuitive touchscreen Target Training Display offers engaging graphics and an LED color wrap that helps instructors and riders gauge intensity (compatible with ANT+ and Bluetooth)
- Integrated testing protocols help instructors and members define and set personalized goals to make the most out of circuits and classes
- Interval, pace, target heart rate, goal-based workouts and Sprint 8 provide training variety
- Aluminum flywheel with 10 precise magnetic resistance settings offers challenge to first-time users and experienced rowers alike
- Ergo Form seat delivers a more comfortable exercise experience
- Seat lock offers enhanced stability when getting on or off the rower
- Long, reinforced handle includes a comfort-enhancing over-mold
- Can be lifted to stand vertically, minimizing footprint
- Transport wheels simplify movement within the facility
- Aluminum rail reinforced with stainless-steel strips adds lasting durability
- Low-maintenance cord and magnetic resistance system provide a smooth, quiet rowing experience

TARGET TRAINING DISPLAY

Designed for goal-based training, the Target Training Display on the RXP Rower will reinvigorate rowing and make your facility stand out. The unique LED wrap helps trainers and members gauge intensity with bright colors and the integrated testing protocols allow members to establish personalized targets just right for their ability level. Whether measuring watts, 500-meter split, heart rate, SPMs, distance, calories or powering through a HIIT workout, members will be more motivated to hit their target.

ROWER

- Adjustable, backlit console makes it easy to access training programs and see complete workout data
- Clearly defined quick keys provide instant access to sprinting, distance rowing and high-intensity interval training programs
- Aluminum flywheel with 10 precise magnetic resistance settings offers challenge to first-time users and experienced rowers alike
- Ergo Form seat delivers a more comfortable exercise experience
- Seat lock offers enhanced stability when getting on or off the rower
- Long, reinforced handle includes a comfort-enhancing over-mold
- Can be lifted to stand vertically, minimizing footprint
- Transport wheels simplify movement within the facility
- Aluminum rail reinforced with stainless-steel strips adds lasting durability
- Low-maintenance cord and magnetic resistance system provide a smooth, quiet rowing experience
- Self-powered design makes it easy to place the unit anywhere in your facility

PROGRAMMING

SIGNATURE PROGRAMMING FOR EVERY NEED

ROWING

When it comes to pure rowing, we provide all the ideas you need to get started. We offer aerobic workouts focused on rhythm, technique, proper breathing and a pace designed to maintain a steady heart rate; anaerobic threshold workouts that challenge rowers to achieve the same meters or time in each set; and race-pace workouts that emphasize short intervals of maximum effort. Each protocol includes warm-up and cool-down parameters to complete a workout experience.

CIRCUIT TRAINING

Incorporate our rower into your large or small group circuit training program to provide an engaging cardio workout between functional stations. Use the rower to complement your existing TRX stations, dumbbell stations, core stations, plyometric stations and more to provide the kind of full-body workout intensity that makes your circuit training program unlike any other.

SPORTS PERFORMANCE TRAINING

For serious rowing enthusiasts and professional athletes, our rower provides dynamic performance that's as close to real rowing as they can get without getting in the water. Quick keys make interval training easy to access, and complete, accurate console data feedback helps instructors refine form and quickly adjust difficulty to help rowers reach their ultimate potential.

KRANKING®

PARTNER WITH A LEGEND

Conceived of by Johnny G, the creator of Spinning®, Kranking is an upper-body stationary cycle workout ideal for professional athletes, wheelchair users and anyone looking to build aerobic capacity, strength and endurance. Whether you offer a complete program or incorporate it into other regimens, Kranking is a unique way to expand your personal and group training offering.

FEATURES

UNIQUE DESIGN. PULSE-POUNDING PERFORMANCE.

EXERCISE VARIETY

Independent crank arms provide greater variety of movement to keep users engaged and brings balance and symmetry back to the upper body..

QUICK TRANSITIONS

Ergonomically designed saddle allows easy transition between seated and standing exercise positions.

INCREASED MUSCLE ACTIVATION

Adjustable crank-arm height encourages greater range of muscle activation.

MULTI-DIRECTIONAL MOVEMENT

Crank and flywheel assembly rotates to accommodate forward and reverse movements.

TRAIN FOR SPEED AND POWER

Shorter crank arms and narrow crank axis encourage speed and power training.

WHEELCHAIR ACCESSIBLE

Krankcycle is wheelchair accessible when purchased without the seat.

ENHANCE YOUR CIRCUIT

Easily integrates into a functional circuit as an upper-body cardio station.

OPTIONAL COMPUTER

Add the optional ANT+ computer to the Krankcycle for workout feedback and a more personalized class experience. Instructors can use the computer feedback to incorporate heart rate and cadence work into group classes.

IMPLEMENTATION

KRANKING ON THE CARDIO FLOOR

Kranking offers a wide array of options including strength training, high intensity, endurance and base building.

KRANK PT

Personal trainers can use the Krankcycle to work one-on-one with their clients to restore balance and symmetry in the upper body, increase strength and endurance, and effectively manage weight.

KRANK CIRCUIT TRAINING

A great addition to any circuit-training program or MX4 workout, the Krankcycle provides an upper-body strength or cardio station to expand training variety.

GROUP TRAINING
TREADMILL

T5XGT TREADMILL

- LED console offers intuitive operation and makes it easy to switch between three preset intensity levels or customize workout intensity to specific fitness goals
- WiFi connectivity accommodates optional Matrix Asset Management system and Workout Tracking Network
- Compatible with xID single-point user sign-in for a seamless personal experience
- Crossbar speed and incline controls make adjustments quick and easy
- Ultimate Deck System for superior performance and durability
- Matrix 5.0 Hp AC motor with Dynamic Response Drive System fine-tunes response based on footfall pattern for a smooth, consistent, natural workout

THE CONNEXUS ADVANTAGE

EXCITING, ATHLETIC, VERSATILE FUNCTIONAL TRAINING

Ideal for functional training classes where users perform weight-bearing exercises that reflect their daily activities, Connexus gives club owners and trainers maximum flexibility, virtually unlimited expandability and the ability to offer immediate feedback to help refine user form. A variety of attachment points accommodate a wide range of accessories and training modalities, so you can create a class that serves each distinct group's fitness level and unique needs.

VERSATILITY

Our Connexus functional training stations feature numerous attachment points that accommodate a wide range of accessories and training modalities including bars, bands, med balls, boxing bags, TRX straps and more depending on the station that's right for your facility. This gives trainers ultimate flexibility to design their own protocols and the ability to build variety into the programming they offer individuals, small groups and classes.

ADJUSTABILITY

Connexus features low, mid and high anchor points that accommodate body weight, resistance and flexibility training for a wide range of individuals and ability levels. Plus, easy-release attachment point simplify setup and transitions between exercises to keep classes and training sessions moving smoothly with little downtime.

EXPANDABILITY

Expansion kits for Connexus Perimeter offer an efficient and cost-effective way to add training capacity and accommodate as many group or circuit training stations as your space allows. You build out the system that suits your needs; Connexus is not one-size-fits-all.

REPEATABILITY

We designed Connexus for small group training as well as functional training classes in which multiple users can perform the same exercises at the same time.

ACCESSIBILITY

The simple setup and operation along with the vast array of possible exercises make it easy for beginners to try Connexus for the first time and for experienced athletes to use it for regular training. While ideal for group training, Connexus works just as well for individuals looking to augment their own strength or flexibility training between classes.

Functional training success
begins with Connexus.

CONNEXUS PERIMETER

- Wall-mounted system optimizes underutilized wall space
- Offers broad training opportunity using bars, bands, med balls, boxing bags, TRX straps and more
- Moveable low, mid and high attachment points offer training flexibility
- Training handles offer easy accessory attachment and accommodate multiple resistance bands for quick transitions and efficient progressions
- Suitable for individual, small group and class training
- Optional expansion kit allows unlimited training potential
- Optional med ball target can be used with slam balls and a wide variety of med balls to enhance power training programs
- Optional magnetic chalkboard features storage slot for chalk, smart phone or tablet & allows trainers to post workout information in highly visible area
- Optional landmine attachment allows trainers to incorporate more explosive power training into programming
- Optional battle rope attachment for enhanced grip, overall strength and muscular endurance

PERIMETER EXPANSION KIT

- Kit anchors directly to Perimeter unit or another expansion kit to maximize training opportunity and optimize space and functionality
- Enables you to create a circuit of unique stations or a small-group training area where multiple individuals can perform the same exercise at the same time
- Offers broad training opportunity using bars, bands, med balls, boxing bags, TRX straps and more
- Moveable low, mid and high attachment points offer training flexibility
- Training handles offer easy accessory attachment and accommodate multiple resistance bands for quick transitions and efficient progressions
- Optional med ball target can be used with slam balls and a wide variety of med balls to enhance power training programs
- Optional magnetic chalkboard features storage slot for chalk, smart phone or Optional landmine attachment allows trainers to incorporate more explosive power training into programming
- Optional battle rope attachment for enhanced grip, overall strength and muscular endurance

A POWERFUL OPPORTUNITY

Get better results with
a better solution.

* As shown with optional med ball target, magnetic chalkboard and landmine attachment.

CONNEXUS FREE

- Freestanding system with multiple training points and 360-degree access
- Offers broad training opportunity using bars, bands, med balls, boxing bags, TRX straps and more
- Moveable low, mid and high attachment points offer training flexibility
- Training handles offer easy accessory attachment and accommodate multiple resistance bands for quick transitions and efficient progressions
- Suitable for individual, small group and class training
- Optional med ball target can be used with slam balls and a wide variety of med balls to enhance power training programs
- Optional magnetic chalkboard features storage slot for chalk smart phone or tablet & allows trainers to post workout information in highly visible area
- Optional landmine attachment allows trainers to incorporate more explosive power training into programming
- Optional battle rope attachment for enhanced grip, overall strength and muscular endurance

CONNEXUS OPTIONS

Expand your training potential with Connexus options, including the med ball target, magnetic chalkboard for training tips and notes and landmine and battle rope attachments.

CONNEXUS COMPACT

- Ideal for adding complete functional training to unused spaces like flat walls and corners
- Moveable low, mid and high attachment points offer training flexibility
- Training handles offer easy accessory attachment and accommodate multiple resistance bands for quick transitions and efficient progressions
- Hinged target protects walls by providing a durable surface for explosive throwing exercises with med balls
- Pull-up bar with cushioned touchpoints and a neutral grip position accommodates wide and narrow grips
- Chrome-plated landmine attachment allows trainers to incorporate more explosive power training into programming
- Chrome-plated base anchor offers a convenient attachment point for battle ropes and resistance bands
- Integrated storage space keeps functional accessories organized, out of the way and easily accessible

CONNEXUS COLUMN

- Ideal for functional training with resistance bands and suspension straps in limited-space areas
- Moveable low, mid and high attachment points offer training flexibility
- Training handle offers easy accessory attachment and accommodates multiple resistance bands for quick transitions and efficient progressions
- Integrated device storage keeps smartphones safely off the ground and in view for use with functional training apps while amplifying device sound
- Built-in storage keeps bands out of the way and easily accessible
- Space-efficient design mounts securely to the wall

CONNEXUS STEP+

- Ideal for improving core, lower-body and cardiovascular fitness through a wide range of simple exercises like mountain climbers, push-ups, squats, dips and balance drills
- Integrated hand grips in the legs allow users to perform push-ups and dips when the step is flipped upside down
- Contoured balance surface provides consistent instability superior to an air bladder surface that can change based on the level of inflation or evaporation
- Textured surface helps prevent slips while the 33 cm / 12.9" height trains users to step above traditional step height to help prevent falls
- Non-slip foot pads with mechanical fasteners on the top and bottom provide excellent in-use stability
- Optimized length and width accommodate users of virtually all sizes
- Stackable design minimize footprint when stored
- Cast-aluminum leg construction provides durability that outlasts traditional plastic steps

STORAGE CARTS

- Keep options, accessories and attachments close at hand for easy setup and transition between classes or groups
- Convenient storage pegs keep resistance bands, circle bands, jump ropes or battle ropes neat and organized
- Info dock holds a tablet or smart phone, which enables users and trainers to access and view their screens during training
- Dual storage shelves with rubber insert were designed to nest a wide range of accessories including kettlebells, slam balls, medicine balls, yoga mats and more
- Heavy-duty casters facilitate movement between training stations and around facility
- 3-shelf Storage Cart: Maximum capacity of 340 kg / 750 lbs.
- 2-shelf Storage Cart: Maximum capacity of 227 kg / 500 lbs.

STORAGE STATION

- Ideal for storing and organizing a wide range of functional training accessories, from lightweight to heavy-duty
- Two extra-large shelves offer rubber-cushioned surfaces for secure storage of kettlebells, slam balls, medicine balls and other bulky items
- Secondary shelves provide ample space for accessories to be arranged by size or type
- Angled pegs feature rubber endcaps for safety and provide convenient hanging storage for resistance bands, suspension straps, battle ropes and jump ropes
- Open top rack makes space for stability balls, yoga mats and foam rollers
- Open base provides additional space to stow steps, balance trainers and more
- Directional placards clearly identify where each accessory belongs for easy organization
- Heavy-duty steel frame stands up to the demands of high-traffic functional training areas
- Maximum capacity of 363 kg / 800 lbs.

TRAINING SUPPORT

TRX SUSPENSION TRAINING MODULE

Developed by the head of education for TRX Suspension Training, the Connexus TRX Module brings the intense challenge and superior results of TRX training to your Connexus group functional training installation. The Connexus TRX Module is a progressive, four-week program with two original weekly workouts for small group or one-on-one training.

BAND & BALL MODULE

The Band & Ball Module is a progressive, four-week program with three original weekly workouts that build strength and power using resistance bands and slam balls that teach the body to work as an integrated system. Workouts are easily modified for greater or less intensity and are applicable for small group or one-on-one training.

BOXING MODULE

The Connexus Boxing Module is a progressive, four-week program with three original weekly workouts that engages the legs, hips, glutes, core, obliques, back, shoulders, chest and arms by punching against resistance. Workouts are easily modified for greater or less intensity and are applicable for small group or one-on-one training.

BODY SCULPT MODULE

This progressive full body strength program emphasizes tempo training to accomplish a targeted goal each week, maximizing muscle strength and hypertrophy. Three forms of resistance training are accomplished using the landmine attachment, flat circular bands, and TRX suspension straps. Workouts are easily modified for greater or less intensity and are applicable for small group or one-on-one training.

EXERCISE LIBRARY

Access a complete index of over 200 Connexus exercises that instructors can use to build and choreograph their own original classes and training routines. They can also use the library to modify existing programming by finding alternate exercises to raise or lower program intensity for members of varying skill and fitness levels. Visit our expansive online Exercise Library or Matrix Learning (www.matrixlearningcenter.com) to see images and videos of each exercise.

MX4 TRAINING SYSTEM

INSPIRE MEMBERS. DELIVER RESULTS. AND DRIVE REVENUE LIKE NEVER BEFORE.

If you're looking to drive revenue and differentiate your group training offering in a way that engages members and delivers results, then you need to bring the MX4 Training System to your facility. Only MX4 combines Matrix-exclusive equipment and original turnkey programming to create signature group exercise experiences that members will come back for again and again.

PROGRAMMING FOR EVERYBODY. AND ANY BODY.

Whether members are striving for maximum cardio, power, strength and endurance in our original MX4 HIIT program or refining balance, coordination, strength and stability in our MX4 Active program, our original turnkey programming provides a complete exercise experience. Using scientifically validated principles, MX4 incorporates natural progressions for a confidence-inspiring experience that improves overall fitness for all ages and ability levels.

LEARN FROM CERTIFIED MASTER TRAINERS*

Our Certified Master Trainers will come to your facility to teach you and your trainers everything you need to help participants establish overall conditioning, enhance their existing abilities and elevate their fitness with MX4.

POWERED BY MATRIX-EXCLUSIVE EQUIPMENT

The MX4 Training System leverages Matrix-exclusive equipment like our Connexus Functional Training System, Connexus Step+, S-Drive Performance Trainer, Rower, Krankcycle and S-Force Performance Trainer. These unique tools can be used in virtually limitless combinations in our MX4 HIIT program to keep group training fresh and engaging so that your members are sure to come back for more. MX4 Active uses the same great training tools in coordination with structured, skill-based programming ideal for helping older and deconditioned adults improve fitness so they can do the things they love.

MX4 HIIT

MX4 HIIT challenges multiple aspects of fitness — cardio, power, strength and endurance — for an intense group exercise experience. Our original turnkey programming and progressions can be modified to fit exercise enthusiasts of all ability levels, helping you reach more members than traditional group training ever could.

MX4 ACTIVE

MX4 Active can help your facility engage older or deconditioned adults in a way right for their abilities and keep them coming back for more. By incorporating low-impact, lower-back friendly exercises, familiar repetitions and natural progressions, MX4 Active delivers a confidence-inspiring experience that improves the overall fitness of older or deconditioned adults.

PROGRAMMING

MX4 HIIT SMALL GROUP TRAINING COURSE*

The MX4 Small Group Training Course is a workshop that teaches trainers and coaches how to run a successful, community-building small group training program that delivers results. Utilizing the Connexus functional training frame combined with the world's best functional training tools, course participants will learn everything they need to help clients elevate their fitness in ways they never thought possible. Course includes:

- Instruction on how to run a successful 30-minute small group training program that builds endurance, strength, power and cardio
- Information about the unique benefits of small group training classes utilizing functional training systems like Connexus
- Essential direction for setting up and coaching small group training classes effectively
- Ways to integrate best-in-class functional training tools like the TRX suspension trainer, soft-shell med ball, flat circular bands, kettlebells, landmine, slam balls and battle ropes
- Guidance on how to integrate traditional and non-traditional cardio exercises with functional training tools to maximize results
- Access to an online exercise library demonstrating over 350 exercises
- 12 unique 30-minute group training workouts for groups of 4 to 12 participants

PROGRAMMING CONT.

MX4 ACTIVE SMALL GROUP TRAINING COURSE*

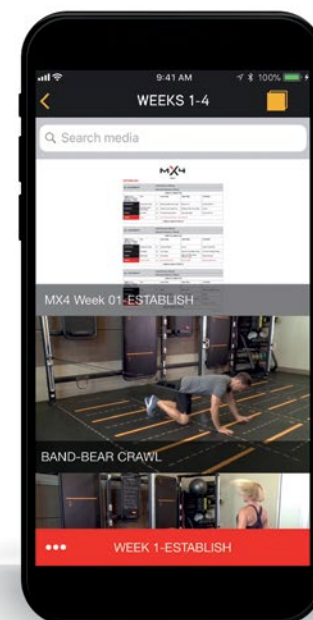

The MX4 Active Small Group Training Course is a workshop that educates trainers and coaches how to run a successful small group training program to meet the needs of aging individuals and those with a low baseline of fitness. Utilizing the same products as the original MX4 small group training program, trainers will learn everything they need in order to deliver fitness solution to older and deconditioned adults in a way that designed specifically for their physiological and biomechanical needs.

Course includes:

- Education on how to run a successful 45-minute session of low-impact, lower-back friendly exercises and natural progressions, focusing on familiarity and repetition to improve stability, functional strength, mobility, flexibility and cardiovascular health
- Essential direction for setting up and delivering a personalized coaching experience to address the needs of those across a wide range of ages and abilities
- Guidance on how to integrate the pre-participation assessment for sessions populated by older participants to determine class readiness
- Information about blending cardio-based modalities with the unique benefits of functional movement training to support gradual improvements to fitness and blood vessel function throughout the body
- Instruction on utilizing the pre-choreographed warm-up and cool-down routines, tailored to meet the unique needs of the target participant
- 26 turnkey, structured workouts with built-in progression for groups of 4 to 8 participants

DOWNLOAD THE APP FOR EVERYTHING MX4

Available through the Matrix Fitness Group Education app, the MX4 Group Training Program gives your trainers complete access to all of our original MX4 programming, all in one place. Discover over 350 exercises featuring our Connexus, S-Drive, Krankcycle and Rower, plus best-in-class training tools like TRX suspension trainer, soft-shell medicine ball, flat circular bands, kettlebells, landmine and battle ropes.

* Availability of the course varies by market.

MATRIX

About Matrix Fitness

Matrix is a brand of Johnson Health Tech (JHT). JHT has been producing premium fitness equipment since 1975 and is among the fastest-growing manufacturers of fitness equipment in the world. It has earned both ISO 9002 and 9001 certifications. A truly global company with 26 subsidiaries worldwide, JHT has the intellectual resources necessary to produce the most technologically advanced equipment on the market and the economies of scale needed to deliver the best value possible.

A group of people are exercising on Matrix Fitness water rowers in a gym. The scene is dimly lit with dramatic lighting highlighting the participants. A large diagonal black line runs from the top right towards the center. The word 'MATRIX' is prominently displayed in the center in a white, bold, sans-serif font, with a small red dot above the 'A'.
